

The Social Service

The social service provides social assistance and social services at the place of residence of any given individual. The social service is an institution established by the local government, which provides social assistance, organises and provides social services to inhabitants of the locality. Each local government in Latvia has a social service, which employs social workers. Meetings can be arranged with social workers at the social service office. Social workers will give advice, provide support and assistance in resolving social problems.

Contact information of local governments' social service offices in Latvia has been gathered here, so that one may learn, what social assistance and social services each local government offers.
